TURCK Introduces *powerfast* for Process Automation

TURCK's modular powerfast cordsets and accessories enable flexible design and easy modification in process automation applications

PLYMOUTH, Minn. (Aug. 5, 2014) – [TURCK](#) expands its *powerfast* line of connectivity products to include a full line of solutions for process automation applications. Designed to replace expensive, time-consuming hardwiring methods, *powerfast* for process automation provides a robust and reliable modular wiring solution. A full line of cordsets, receptacles, reducers, reducer tees and power *lokfast* devices provides users with the ability to configure a complete power distribution system.

TURCK's *powerfast* for process automation connectivity products are UL approved and available in A-Size (7/8") and D-Size (1-3/8") connectors, and are rated for up to 30 amps of power for a wide range of operation. Additionally, TURCK process automation *powerfast* products carry FM approval for use in class I division 2 hazardous locations. Offering easy installation and customization, the *powerfast* system delivers flexible design capabilities, quick modifications and expandable options.

"We created the process *powerfast* line in response to customer requests that were looking for a modular power solution for their process applications," explained Jay Bartsias, senior product manager for TURCK's connectivity division. "Now, we can offer our process customers the same convenient solution that was previously only available for factory automation applications."

The A-size *powerfast* for process automation solution is IP67 rated and the D-size solution is IP67, 68, and 69k rated. Both product lines are NEMA 1, 3, 4, and 6P rated with a temperature rating up to 90 degrees Celsius.

For more information regarding the FM approval certification or control drawings for these products,
